## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 28, 2007 has been entered.

### ***Response to Amendment***

Applicant's amendment to the claims, filed on November 21, 2007, is acknowledged. Entry of amendment is accepted and made of record. Currently, claims 1 – 16 are pending in light of the amendment, in which: claim 1 was amended; no claim was cancelled; no claim was withdrawn; and no claim was added.

### ***Response to Arguments/Remarks***

Applicant's response filed on November 21, 2007 is acknowledged and is answered as follows.

Applicant's arguments, see pgs. 5 – 7, with respect to the rejection of claims have been fully considered and are persuasive in view of the amendment. Therefore, the rejections have been rendered moot.

***Allowable Subject Matter***

Claims 1 – 16 are allowed.

The following is an examiner's statement of reasons for the indication of allowable subject matter: The cited art, whether taken singularly or in combination, especially when all limitations are considered within the claimed specific combination, fails to teach or render obvious:

Claim 1: An electrode for gallium nitride based compound semiconductor light-emitting device comprising one and only one continuous light-permeable first layer in contact with a surface of a p-contact layer in a gallium nitride based compound semiconductor light-emitting device, and a second layer in contact with part of a surface of p-contact layer and parted in plural portions on the surface of the p-contact layer, wherein the first layer comprises a metal or alloys of Au, Pt, Pd, Ni, Co, and Rh and the second layer comprises an oxide metal of Ni, Ti, Sn, Cr, Co, Zn, Cu, Mg, and In. Claims 2 – 15 depend from claim 1.

Claim 16: A gallium nitride based compound semiconductor light-emitting device having claim 1's electrode structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. From Notice of References Cited:

Ref. A: Ref. no. 180 is of interest. However, the ref. teaches that the layers are in reverse order in view of Applicant's claimed invention.

Ref. B. Ref. nos. 114 – 116 of Fig. 9 is of interest. However, the ref. does not disclose for gallium nitride based compound device.

Ref. C: Figs. 1 – 2 are of interest. However, the ohmic contact layer is not structured like Applicant's claimed invention.

Refs. U – V: The refs. teaches that the layers are in reverse order in view of Applicant's claimed invention.
